1. Claims 1-25 are rejected under 35 USC 112, second paragraph.

In each of independent claims 1, 9, 19, and 20, the use of the phrase “a plurality of moving target indication data” makes the claim indefinite and unclear. The phrase is not clear as to what the “plurality” is. For example, does this phrase mean moving target indication data for a plurality of targets? Or, does it mean a plurality of sets of moving target indication data for a single target? Or, does it mean something different than these two examples?

Dependent claim 8 is indefinite and unclear in that it depends from itself. Dependent claims 2-7, 10-18, and 21-25 are unclear in that they depend from unclear independent claims.

2. The examiner cited prior art herewith is of general interest.

Hasan ('590); Naidich et al ('912); Dentino ('017); Freedman ('500); and Cooper ('489) are of general interest for relating to prior art MTI radar systems and methods. None of the references of record appears to perform the claimed automatic association of moving target indications.
